

CARE INSTRUCTIONS

Unsurpassed Ease of Care

[Print Version](#)

- Remove stain immediately
- Spot clean with mild soap and water
- Air dry or dry quickly with warm setting of a hair dryer
- For stubborn stains, use mild solvent
- For tougher stains Fantastik® and Formula 409® brand spray cleaner have been shown to be successful
- Disinfect with a 5:1 bleach solution
- Machine washable – gentle wash cycle

For the following stains, a mild detergent may be used.
Blot or wipe stains immediately.

* [BALLPOINT PEN INK REMOVAL I INSTRUCTIONS](#)

PEN REMOVAL

Ballpoint Pen Removal Instructions		
	<p>1. Wipe the stain off with ethanol (rubbing alcohol).</p> <p>2. Prepare a solution of 50% non-chlorinated bleach, 50% water.</p> <p>3. Place a thin line of tissue over the ink stain.</p> <p>4. Apply the non-chlorinated bleach solution to the tissue. Be sure to not over saturate the tissue.</p> <p>5. Cover tissue with polyethylene film (Plastic Wrap) to prevent the non-chlorinated bleach solution from drying.</p>	
	<p>6. Check on stain repeatedly.</p> <p>7. Do not leave the non-chlorinated bleach solution on for more than 1 hour.</p> <p>8. When the stain looks almost gone, remove the tissue and wash the stain with water.</p> <p>9. To neutralize the bleached area, place tissues on the bleached area and apply 15% hydrogen peroxide solution.</p> <p>10. Leave on for 30 minutes, and then remove the tissues.</p>	
	<p>11. Remove the peroxide residue with water.</p> <p>While the foregoing instructions have proven to work in many cases, especially in which ink stains are addressed immediately, not all ink stains can be removed in every situation.</p>
