### The Amazing USCG 47MLB

The U.S. Coast Guards 47-foot Motor Lifeboat (47MLB), is a heavy weather patrol/rescue craft designed to operate in extreme conditions to help save lives. Surpassing search and rescue technologies of the past, the 47MLB operates successfully in such extreme conditions as hurricane-force winds and 20+ foot breaking seas. Along with the ability to safely survive a 360° rollover, the boat can pitch-poll, flipping end over end or roll over in swells and right itself in less than 10 seconds. With a combination of open and enclosed bridge steering stations, the crew's comfort and performance is essential. That's why STIDD Systems' Series 500 Admirals are standard equipment aboard every production 47MLB.

## 500-100 HIGH BACK ADMIRAL

Comfort & strength for work or play. Outfitted with the same features as our deluxe high backs but finished in tough baked-on powdercoat, Series 500-100 all-purpose high back models fit boats and mariners of every shape and size.
