The LCS Freedom variant team led by Lockheed Martin

The LCS Independence variant team led by General Dynamics and Austal USA

STIDD Systems, Inc. is proud to support the US Navy LCS (Littoral Combat Ship) program - with seats aboard both LCS variants. The Littoral Combat Ship (LCS) class is a fast, agile, focused-mission platform designed for operation in near-shore environments yet capable of open-ocean operation.

STIDD has been selected to provide the Bridge seating for both variants of the cutting edge US Navy LCS (Littoral Combat Ship) program and is also provides the standard seating for the CDS (Common Display System) program, which provides standardized interchangeable systems for all classes of US Navy Ships.

With direct replacements for numerous existing shipboard legacy NSNs, STIDD is committed to updating the aging WWII Era seating aboard US Navy ships by providing biomechanically correct seating with unsurpassed quality and comfort imbedded into every STIDD product.
